

GENERATIVE AI IN EDUCATION TRAINING

Transform your teaching with AI

Introduction

This training empowers educators and trainers to integrate AI tools into their practices through **hands-on, practical** learning. This course aims to provide a comprehensive understanding of Generative AI and its applications within the educational sector.

Participants will explore the fundamentals of Generative AI, assess its benefits and risks, and design AI-supported learning activities to enhance educational content creation.

Target Audience

- Adult educators and trainers
- VET professionals
- Curriculum designers
- Non-formal education facilitators

Learning Objectives

- Understand Generative AI fundamentals
- Explore AI applications in education
- Assess benefits and risks
- Design AI-supported learning activities
- Create educational content using AI

Programme Overview

Day 1: Introduction to AI in education

Day 2: Benefits, risks, and ethics

Day 3: Personalised learning

Day 4: Teaching & administration

Day 5: Hands-on content creation

Outcomes

Participants will gain practical AI skills, improve digital competencies, and develop innovative teaching materials.
